Offering an excellent **quality/price ratio**, they are the best way to have access to a heat pump that is simple, reliable and economical (for pool volumes up to 60 m<sup>3</sup> maximum).

HEATING

# ZODIAC®

*a better life*

## Why opt for a Power heat pump?

It's **the most economical heating solution**, as nearly 80% of the energy used to heat your pool... is extracted from the surrounding air! Example: 1 kW of electricity = 5 kW returned to your pool.

Efficient, it is also economical to use.

- Focused on pool users' needs, Power offers a simple and economical solution for heating your swimming pool and also benefits from Zodiac® quality and service.

## You'll love its simplicity!

Thanks to its LCD screen, simply press Start, select the desired temperature, Power will do the rest.

Easy to install thanks to the supplied connectors and power cord.

Ultra simple

Compact and discrete

## It boasts the reliability of a larger model!

With its rust-resistant Titanium exchanger, Power can heat all types of pool water, regardless of the source and treatment system (seawater, chlorine, bromine, ozone treatment, chlorine-free products, electro-physical and electrochemical treatments).

100% Zodiac® design

Zodiac® service and quality
